

NLDVR320/80

Single Channel Digital Video Recorder

This DVR records images on a removeable hard disk drive. These digitally recorded images have several advantages over analog recordings on tape. There is no need to adjust tracking or buy and store tapes. Digital video can be indexed by time or events, and you can instantly view video after selecting the time or event. You can freeze frames, fast forward, fast reverse, slow forward and slow reverse, without image streaking or tearing. This unit can be used as a replacement for a time lapse VCR in a security application.
